Details

Show Execution Time Expand All

File	ExecTime	Status	Action
/test/integration/device.integration.spec.ts	00:00.535	All Passed 35	
Merge Data			
Device Module Integration Test > GET /device/:id - Retrieve Device by ID > should retrieve a device by ID and return correct response structure	00:00.118	Passed	
Device Module Integration Test > GET /device/:id - Retrieve Device by ID > should include all datapoint properties in response	00:00.011	Passed	
Device Module Integration Test > GET /device/:id - Retrieve Device by ID > should return 500 when port throws error	00:00.009	Passed	
Device Module Integration Test > GET /device/:id - Retrieve Device by ID > should pass correct command to port	00:00.009	Passed	
Device Module Integration Test > GET /device/plant/:plantId - Retrieve Devices by Plant > should retrieve all devices for a plant	00:00.009	Passed	
Device Module Integration Test > GET /device/plant/:plantId - Retrieve Devices by Plant > should return empty array when plant has no devices	00:00.013	Passed	
Device Module Integration Test > GET /device/plant/:plantId - Retrieve Devices by Plant > should maintain plant association for all devices	00:00.008	Passed	
Device Module Integration Test > GET /device/plant/:plantId - Retrieve Devices by Plant > should return 500 when port throws error	00:00.008	Passed	

File	ExecTime	Status	Action
Device Module Integration Test > POST /device - Write Datapoint Value > should accept write datapoint request and return 202	00:00.014	Passed	
Device Module Integration Test > POST /device - Write Datapoint Value > should reject request without datapointId	00:00.008	Passed	
Device Module Integration Test > POST /device - Write Datapoint Value > should reject request without value	00:00.007	Passed	
Device Module Integration Test > POST /device - Write Datapoint Value > should handle various value types (number, string, boolean)	00:00.011	Passed	
Device Module Integration Test > POST /device - Write Datapoint Value > should return 503 when service unavailable	00:00.007	Passed	
Device Module Integration Test > POST /device - Write Datapoint Value > should add plantId to command based on device lookup	00:00.011	Passed	
Device Module Integration Test > POST /device/update - Ingest Timeseries from Webhook > should handle Error objects in ingestion and alarm catches	00:00.070	Passed	
Device Module Integration Test > POST /device/update - Ingest Timeseries from Webhook > should handle non-Error values in ingestion and alarm catches	00:00.069	Passed	
Device Module Integration Test > POST /device/update - Ingest Timeseries from Webhook > should accept webhook payload with datapoint updates	00:00.010	Passed	
Device Module Integration Test > POST /device/update - Ingest Timeseries from Webhook > should filter non-datapoint items from webhook payload	00:00.009	Passed	
Device Module Integration Test > POST /device/update - Ingest Timeseries from Webhook > should validate required fields (value and timestamp)	00:00.008	Passed	
Device Module Integration Test > POST /device/update - Ingest Timeseries from Webhook > should trigger alarm check for each valid datapoint	00:00.008	Passed	
Device Module Integration Test > POST /device/update - Ingest Timeseries from Webhook > should handle empty webhook payload	00:00.007	Passed	
Device Module Integration Test > POST /device/update - Ingest Timeseries from Webhook > should accept webhook without UserGuard	00:00.007	Passed	
Device Module Integration Test > GET /device/:deviceId/value - Retrieve Device Values > should retrieve current values for a device	00:00.011	Passed	
Device Module Integration Test > GET /device/:deviceId/value - Retrieve Device Values > should return DatapointValue objects with correct structure	00:00.007	Passed	
Device Module Integration Test > GET /device/:deviceId/value - Retrieve Device Values > should pass plantId to getDeviceValue port	00:00.007	Passed	
Device Module Integration Test > GET /device/:deviceId/value - Retrieve Device Values > should return 500 when port fails	00:00.007	Passed	
Device Module Integration Test > Complete Device Workflows > should handle full device lifecycle: find -> write -> read values	00:00.008	Passed	

File	ExecTime	Status	Action
Device Module Integration Test > Complete Device Workflows > should handle multiple devices in same plant	00:00.009	Passed	
Device Module Integration Test > Complete Device Workflows > should process webhook and trigger alarms concurrently	00:00.008	Passed	
Device Module Integration Test > Error Handling & Edge Cases > should execute guard clauses for missing params in controller methods	00:00.006	Passed	
Device Module Integration Test > Error Handling & Edge Cases > should reject service calls when required identifiers are missing	00:00.009	Passed	
Device Module Integration Test > Error Handling & Edge Cases > should handle port failures without crashing	00:00.009	Passed	
Device Module Integration Test > Error Handling & Edge Cases > should isolate failures between requests	00:00.008	Passed	
Device Module Integration Test > Error Handling & Edge Cases > should track method call counts across multiple requests	00:00.007	Passed	
Device Module Integration Test > Error Handling & Edge Cases > should handle null/undefined values gracefully	00:00.008	Passed	
/test/integration/cache.integration.spec.ts	00:00.693	All Passed 12	
Merge Data			
Cache Integration Test > should process webhook and write plant cache using real cache flow	00:00.091	Passed	
Cache Integration Test > should refresh all plants on fetched.tokens event	00:00.107	Passed	
Cache Integration Test > should reject updateCache use case when plantId is missing	00:00.010	Passed	
Cache Integration Test > should handle webhook update failure with Error without crashing	00:00.096	Passed	
Cache Integration Test > should handle webhook update failure with non-Error value	00:00.071	Passed	
Cache Integration Test > should mark updateAllCache flow as failed when one plant write fails	00:00.126	Passed	
Cache Integration Test > should skip duplicate cache sync events while one sync is already running	00:00.004	Passed	
Cache Integration Test > should throw when cache write operation fails in updateCache use case	00:00.005	Passed	
Cache Integration Test > should execute queue catch branch with Error in HttpCacheController	00:00.045	Passed	
Cache Integration Test > should execute queue catch branch with non-Error in HttpCacheController	00:00.046	Passed	
Cache Integration Test > should execute webhook per-plant catch with real Error instance	00:00.046	Passed	
Cache Integration Test > should execute webhook per-plant catch with non-Error value	00:00.046	Passed	
/test/integration/subscription.integration.spec.ts	00:00.378	All Passed 15	

File	ExecTime	Status	Action
Merge Data			
Subscription Integration Test > should refresh subscriptions for all plants on cache.all.updated	00:00.149	Passed	
Subscription Integration Test > should refresh subscriptions for one plant on cache.updated	00:00.133	Passed	
Subscription Integration Test > should execute node cron flow with real service	00:00.009	Passed	
Subscription Integration Test > should execute datapoint cron flow with real service	00:00.007	Passed	
Subscription Integration Test > should skip duplicate full-cache refresh event while another refresh is running	00:00.007	Passed	
Subscription Integration Test > should handle full-cache refresh errors without throwing	00:00.007	Passed	
Subscription Integration Test > should handle invalid cache.updated payload without throwing	00:00.006	Passed	
Subscription Integration Test > should handle node refresh when no plant IDs are available	00:00.006	Passed	
Subscription Integration Test > should handle node refresh when repository returns false	00:00.006	Passed	
Subscription Integration Test > should handle datapoint refresh when repository returns false	00:00.006	Passed	
Subscription Integration Test > should handle datapoint refresh when location lookup is invalid	00:00.006	Passed	
Subscription Integration Test > should throw when refreshAllSubscription is called without plantId	00:00.017	Passed	
Subscription Integration Test > should keep going when node refresh fails in refreshAllSubscription	00:00.007	Passed	
Subscription Integration Test > should return false when datapoint refresh fails in refreshAllSubscription	00:00.006	Passed	
Subscription Integration Test > should return false when adapter throws in refreshAllSubscription	00:00.006	Passed	
/test/integration/notifications.integration.spec.ts	00:00.166	All Passed 5	
Notifications Integration Test > should handle alarm.activated event and persist notification	00:00.084	Passed	
Notifications Integration Test > should handle alarm.resolved event and persist notification	00:00.045	Passed	
Notifications Integration Test > should ignore invalid alarm payload without throwing	00:00.025	Passed	
Notifications Integration Test > should reject ward notification when alarmEventId is missing	00:00.008	Passed	
Notifications Integration Test > should reject resolution notification when wardId is missing	00:00.004	Passed	

File	ExecTime	Status	Action
/test/integration/api-auth-vimar.integration.spec.ts	00:00.154	All Passed 20	
Merge Data			
ApiAuthVimar Integration Test > should return account status from real token service and cache repository	00:00.051	Passed	
ApiAuthVimar Integration Test > should prepare and authorize OAuth ticket end-to-end	00:00.009	Passed	
ApiAuthVimar Integration Test > should prepare OAuth ticket when JWT user id is a numeric string	00:00.005	Passed	
ApiAuthVimar Integration Test > should return 401 when prepare-oauth user identity is invalid	00:00.005	Passed	
ApiAuthVimar Integration Test > should return 400 when authorize redirect_url is missing	00:00.006	Passed	
ApiAuthVimar Integration Test > should return 401 when authorize ticket is invalid	00:00.005	Passed	
ApiAuthVimar Integration Test > should handle callback and persist tokens with real token flow	00:00.005	Passed	
ApiAuthVimar Integration Test > should disconnect account by clearing token cache	00:00.005	Passed	
ApiAuthVimar Integration Test > should return disconnected status when account status read fails	00:00.004	Passed	
ApiAuthVimar Integration Test > should return 500 when disconnect query fails	00:00.004	Passed	
ApiAuthVimar Integration Test > should return 400 when callback code is missing	00:00.004	Passed	
ApiAuthVimar Integration Test > should return 400 when callback state is missing	00:00.004	Passed	
ApiAuthVimar Integration Test > should return 400 when callback state is not valid JSON	00:00.010	Passed	
ApiAuthVimar Integration Test > should return 400 when callback state payload is invalid	00:00.005	Passed	
ApiAuthVimar Integration Test > should return 400 when callback state has invalid redirectUrl	00:00.004	Passed	
ApiAuthVimar Integration Test > should return 400 when callback state has invalid userId	00:00.005	Passed	
ApiAuthVimar Integration Test > should return 500 when callback token exchange fails	00:00.010	Passed	
ApiAuthVimar Integration Test > should cover ApiAuthVimarService config guard branches	00:00.005	Passed	
ApiAuthVimar Integration Test > should cover OAuthTicketService validation branches	00:00.004	Passed	
ApiAuthVimar Integration Test > should cover TokenService getValidToken refresh branches	00:00.004	Passed	
/test/integration/alarms.integration.spec.ts	00:00.117	All Passed 10	

File	ExecTime	Status	Action
Merge Data			
Alarms Integration Test > should create alarm rule through real controller/service/repository	00:00.064	Passed	
Alarms Integration Test > should list alarm rules	00:00.008	Passed	
Alarms Integration Test > should get alarm rule by id	00:00.006	Passed	
Alarms Integration Test > should list managed alarm events for a user	00:00.012	Passed	
Alarms Integration Test > should list unmanaged alarm events for a user	00:00.005	Passed	
Alarms Integration Test > should list all alarm events	00:00.005	Passed	
Alarms Integration Test > should get one alarm event by id	00:00.005	Passed	
Alarms Integration Test > should resolve alarm event and emit resolution flow	00:00.004	Passed	
Alarms Integration Test > should update and delete alarm rules through real service	00:00.004	Passed	
Alarms Integration Test > should execute checkAlarmRule flow and create alarm event	00:00.004	Passed	
/test/integration/wards.integration.spec.ts	00:00.038	All Passed 3	
Wards Integration Test > should create and list wards with real service and adapters	00:00.025	Passed	
Wards Integration Test > should add and remove user from ward	00:00.007	Passed	
Wards Integration Test > should add and list plants for a ward	00:00.006	Passed	
/test/integration/auth.integration.spec.ts	00:00.039	All Passed 4	
Auth Integration Test > should login and set refresh cookie with real auth flow	00:00.029	Passed	
Auth Integration Test > should execute first-login end to end and persist credentials change	00:00.004	Passed	
Auth Integration Test > should refresh token from cookie generated by /auth/login	00:00.004	Passed	
Auth Integration Test > should return 401 on /auth/refresh without cookie	00:00.002	Passed	
/test/integration/analytics.integration.spec.ts	00:00.034	All Passed 5	

File	ExecTime	Status	Action
Analytics Integration Test > should retrieve all analytics given the plantId	00:00.021	Passed	
Analytics Integration Test > should return one PlotDto per strategy	00:00.004	Passed	
Analytics Integration Test > should return 500 when all strategies fail	00:00.006	Passed	
Analytics Integration Test > should return 404 when plantId query param is missing	00:00.002	Passed	
Analytics Integration Test > should throw when suggestion service receives no suggestion from LLM port	00:00.001	Passed	
/test/integration/plant.integration.spec.ts	00:00.048	All Passed 7	
Plant Integration Test > should retrieve plant by id with real repository	00:00.021	Passed	
Plant Integration Test > should return only available plants	00:00.004	Passed	
Plant Integration Test > should return all plants	00:00.003	Passed	
Plant Integration Test > should return 404 when plantid query param is missing	00:00.003	Passed	
Plant Integration Test > should return 404 when plant is not found	00:00.003	Passed	
Plant Integration Test > should return fallback message when no available plants are found	00:00.010	Passed	
Plant Integration Test > should return fallback message when no plants are found	00:00.004	Passed	
/test/integration/users.integration.spec.ts	00:00.039	All Passed 3	
Users Integration Test > should list users using real controller/service/adapter/repository chain	00:00.028	Passed	
Users Integration Test > should create user and return generated tempPassword	00:00.007	Passed	
Users Integration Test > should validate payload on create user	00:00.004	Passed
